Transmission Services Product Pricing Validation

Revision Posted: September 21, 2011

Effective Date: October 3, 2011 at 09:00 PPT

Note: The price validation check will not be performed for TSRs submitted between 08:00 and 09:00 PPT on the above effective date.

On October 3, 2011, at 08:00 (PPT), Transmission Services will be updating the OASIS default product prices to reflect the 2012 Transmission & Ancillary Service Rate Schedules. This OASIS function will operate as is has in the past, with the highest default price for the requested service displayed in the Bid Price field of the Transmission Service Request (TSR). Any customer using a template other than the one provided by OASIS to submit a TSR must update that template to reflect the new default prices to prevent that TSR from failing the pricing validation check. The Bid Price will not be validated during this update only.

The rate that the customer will be charged will be per the [2012 Transmission & Ancillary Service Rate Schedules](#).
